

**UTD-CS Department-CS 5348**

**Fall 2021-Project 1**

Write a c program whose main program forks exactly 8 children. Each child should output what its position in the list of children and print its number. For example, the second child should print something like "I am child number: 2". No child should fork a process; only the main program or the original program should fork.

Due date: 9/28/2021; 11:59 pm.

This is an individual project with each student doing this on their own.
